- Note:** 1. The above data is for reference only. If customers use essential oils with different viscosities, the oil consumption will vary.
 2. For the best diffusion effect, it's recommended to use essential oils with a viscosity below 30mPa.s. And the optimal working temperature is 25°C.

06 Warning

1. Please keep the machine vertical after installation. Tilting or lying flat can cause oil to overflow, and the circuit board may be contaminated, which could affect its efficiency.
2. Should not modify, dismantle or repair the machine arbitrarily. Any malfunction occurs, please contact the relevant technician immediately.
3. The machine does not work when it is not in the programmed working period, even the atomization icon is displayed on the screen;
4. When the machine is in lock status, the button can not be operated and there is no display on screen.
